

POSITION STATEMENT WASTE

Sustainability is a guiding principle at Afan Group. The company is committed to continually reducing adverse impact on society and developing sustainable responses.

Our long term aspiration is to design and build the landscape with zero net waste. This is consistent with AFL's Environmental Policy.

We are committed to working with our design and procurement teams, and our supply chain to eliminate wastage of materials, placing emphasis on reduction, reuse and recycle.

Our focus is to plan, design, procure and operate in a practical manner that prevents waste.

To achieve this target and work towards our aspirations we are committed to the following actions:

- Ensure compliance with all waste legislation.
- Seek innovative solutions to reduce, reuse and recycle waste, and divert waste from landfill and reduce the cost of managing our waste material.
- Develop a waste process map which highlights areas in which to take action.
- Implement actions through tasks undertaken by a variety of job holders at all our projects and offices.
- Implement a Net Waste methodology across all our major projects.
- Establish and implement awareness raising programmes, such as the "No Waste" training programmes, across all our major projects and offices.

We will monitor progress regularly and report annually on these actions and our overall waste management outcomes
